---

Valmichael,

I have 3802 for the PRP lock & 7303 for the TXDOT lock; still the same?

Thanks,

Gary Miller

Gary,

I mentioned to you a month ago or so that my section manager and division director want to see the site. They don't need an EPA escort as long as we can get the combination. They will stay in the car but would like to drive as close as possible. Somebody in our region office who is coordinating this site visit went to the site and noticed there were 2 combination locks. Same combination? Thanks.

Stephen
